

Pirelli Tyres Romania s.r.l.

Politica Pirelli Tyres Romania S.R.L. in domeniul Energiei

Datorita unui angajament constat al managementului, Pirelli a oblinut cele mai bune rezultate in diferite domenii specifice unui management performant care tine cont de toate partile interesate: etica in afaceri, inovatia, atentia pentru drepturile omului si sanatatea si siguranta lucradorilor, managementul schimbarilor climatice, reducerea emisiilor de CO2, atentia la codurile de conduits ale furnizorilor, managementul biodiversitatii, sustenabilitatea mediului, a produselor si securitatea cibernetica.

In calitate de producator de anvelope promovam utilizarea responsabila a resurselor energetice necesare si urmarim se" crestenn in mod durabil eficienta energetica, sa reducem costurile, consumul de energie promovam sustenabilitatea economics pe termen lung prin imbunatatirea continua a proceselor si produselor.

Sustenabilitatea si siguranta stau la baza filozofiei produselor noastre incepand de la construirea unor cicluri de viata imbunatatite ale produselor pane' la reducerea amprentei de CO2 in fiecare vehicul, material si proces.

Managementul asigura compatibilitatea dintre politica si obiectivele in domeniul energiei si directia strategics de dezvoltare a organizatiei.

Abordarea noastra Eco-Safety consta intr-o preocupare permanenta pentru proiectarea si productia unor anvelope fare' niciun compromis in ceea ce priveste siguranta in orice conditii de condus, care să:

- contina un procent cat mai mare de componente din materiale reciclabile sau bazate pe surse bio;
- alba o clurata de rulare cat mai mare;
- disipe mai putina energie datorita rezistentei scazute la rulare care are un rol esential in reducerea consumului de combustibil si de energie si prin urmare, a emisiilor de CO2.

In vederea imbunatatirii performantei energetice managementul superior se angajeaza sa:

- aplice masuri pentru reducerea consumului de energie pe unitatea de productie;
- imbunatateasca continuu performanta energetica si sistemul de management al energiei;
- reduce' pierderile de energie, imbunatateasca consumurile și sa reduce' costurile cu energia;
- asigure toate resursele Si disponibilitatea informatiilor necesare pentru a indeplini obiectivele si tintele in domeniul energiei;
- se conformeze legislatiei aplicabile si altor cerinte relevante in domeniul energiei;
- tina cont de imbunatatirea performantei energetice in cadrul noilor proiecte investitii precum Si in cadrul modificarilor pe care organizatia le promoveaza in privinta echipamentelor, instalatiilor, sistemelor și proceselor;
- promoveze achizitionarea si utilizarea de produse si servicii eficiente din punct de vedere energetic.

Toti angajatii sunt permanent constientizati de asumarea intr-un mod activ a indeplinirii strategiei Si politicii in domeniul managementului energiei.

Politica in domeniul energiei este disponibila, comunicata, inteleasa și aplicata la toate nivelurile in cadrul organizatiei si este disponibila tuturor partilor interesate relevante.

Pirelli Tyres Romania S.R.L. - Energy Policy

Thanks to a consistent commitment of the management, Pirelli has achieved the best results in various areas specific to a high-performance management that takes into account all stakeholders: business ethics, innovation, attention to human rights and workers' health and safety, climate change management, CO2 emission reduction, attention to supplier codes of conduct, biodiversity management, environmental, product sustainability and cybersecurity.

As a tire manufacturer, we promote the responsible use of necessary energy resources and aim to sustainably increase energy efficiency, reduce costs, energy consumption and promote long-term economic sustainability through continuous improvement of processes and products.

Sustainability and safety are at the heart of our product philosophy, from building improved product life cycles to reducing the CO2 footprint in each vehicle, material and process.

Management ensures the compatibility between the energy policy and objectives and the strategic development direction of the organization.

Our Eco-Safety approach consists of a permanent concern for the design and production of tires without any compromise in terms of safety in all driving conditions, which:

- contain as high a percentage of components from recyclable or bio-based materials as possible;
- have as long a lifespan as possible;
- dissipate less energy due to low rolling resistance which plays an essential role in reducing fuel and energy consumption and therefore CO2 emissions.

In order to improve energy performance, senior management is committed to:

- apply measures to reduce energy consumption per production unit;
- continuously improve energy performance and the energy management system;
- reduce energy losses, improve consumption and reduce energy costs;
- ensure all the resources and availability of the information necessary to meet the objectives and targets in the field of energy;
- comply with applicable legislation and other relevant requirements in the field of energy;
- take into account the improvement of energy performance in new projects and investments as well as in the changes that the organization promotes in terms of equipment, installations, systems and processes;
- promote the purchase and use of energy-efficient products and services.

All employees are constantly aware of the active assumption of the fulfillment of the strategy and policy in the field of energy management.

The energy policy is available, communicated, understood and applied at all levels within the organization and is available to all relevant stakeholders.
